

INDUSTRIAL S E R I E S

Automotive Computer Memory Saver

Industrial Series Accessory Connector
Model INC-12V-OBD

On Board Diagnostic Connector (OBD II)

- This accessory connector plugs the OBD II head into the car's OBD II source.
- Insert the male connector into an external power-source to save the electrical settings within the vehicle when the battery is disconnected.
- Protects vehicle fault codes, driveability codes, keyless entry codes and digital radio settings.
